+91 8307398746 | deepanshusingla0076@gmail.com | deepanshusingla.me | linkedin.com/in/deepanshu-singla | github.com/deepanshusingla076

Education

Chitkara University

Bachelor of Engineering in Computer Science Engineering, CGPA: 9.13/10

Punjab, India

Aug 2023 – Aug 2027

Experience

Open Source Contributor

Jul 2025 – Sep 2025

GirlScript Summer of Code

Remote

- Collaborated with a distributed team of contributors to ship backend features and REST API enhancements, following Git branching workflows and peer code reviews.
- Proactively diagnosed and resolved production bugs, refactoring legacy modules into reusable components that boosted server performance and long-term maintainability.

Projects

B-ware – AI Claim Verification Platform

GitHub | Live

Node.js, Express.js, MySQL, Redis, Docker, Firebase, Next.js

Feb 2026

- Developed an AI-powered claim verification platform automating evidence extraction and misinformation detection through concurrent workflows.
- Led the design of a scalable verification pipeline with asynchronous processing and a secure REST API using Node.js and Express.js.
- Boosted throughput by 45% via Redis caching, streamlined API handling, and concurrent processing techniques.

AetherMeet – Real-Time Collaboration Platform

GitHub | Live

Node.js, Express.js, Socket.io, Redis, MongoDB, React.js, JWT

Oct 2025

- Built a real-time collaboration platform serving 100+ concurrent users through low-latency WebSocket communication and an event-driven architecture.
- Engineered, secured, and documented 15+ RESTful endpoints for authentication, messaging, notifications, and workspace management, enabling smooth handoff to teammates.
- Cut API response latency by 40% through targeted caching, optimized MongoDB queries, and non-blocking request handling.

FiSight – Financial Analytics Platform

GitHub | Live

Node.js, Express.js, Python, MySQL, MongoDB, Next.js

May 2025

- Delivered a full-stack financial analytics platform processing 50,000+ records for forecasting, reporting, and business-intelligence dashboards.
- Integrated AI-driven predictive models achieving 92% forecasting accuracy and presented insights that guided financial trend analysis and decision-making.
- Accelerated large-scale MySQL query execution by 35% through indexing and pipeline tuning.

Technical Skills

Languages: Java, JavaScript, Python, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend & Web Technologies: Node.js, Express.js, REST APIs, Socket.io, WebSockets, JWT Authentication, Microservices

Databases: MySQL, MongoDB, Redis

Cloud & DevOps: Docker, AWS EC2, AWS S3, Linux, GitHub Actions, CI/CD Pipelines

Core Concepts: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Developer Tools: Git, GitHub, Postman, Firebase, VS Code

Certifications

- MERN Stack Development – ThinkQubator
- Cloud Computing Fundamentals – Coursera
- Introduction to Generative AI – Google Cloud
- Generative AI and Agents – Microsoft

Achievements

- Solved 300+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- Completed the 160 Days of Problem Solving Challenge on GeeksforGeeks.
- Participated in GDG Hacks 2025, HackRX 6.0, BharatTechperience 2.0, and Google Cloud AI Day 2025.
